SUMMARY

Experienced Senior Software Engineer with 4.5 years (including 1 year freelancing) of hands-on experience in developing and maintaining cross-platform applications using Flutter for Android, iOS, and web. Delivered production-ready apps across various domains, including social media, e-commerce, job search, and AI-based platforms. Skilled in integrating RESTful APIs and Firebase services, implementing scalable state management (BLoC, Provider), and setting up CI/CD pipelines using GitHub Actions. Proven track record of reducing crash rates, improving development workflows, and delivering projects ahead of schedule. Adept at mentoring junior developers, conducting code reviews, and collaborating in Agile teams to align technical solutions with business goals.

EXPERIENCE

Senior Software Engineer | Lektik Consultancies

September 2023 - Present, Infopark, Kakkanad, Kerala

- Developed and maintained cross-platform applications using Flutter for web, Android, and iOS, delivering smooth and high-performance user experiences.
- Built and scaled an AI-based biography generation app with 734 active users, focusing on performance and user engagement.
- Designed intuitive, user-centric interfaces by translating complex requirements into visually appealing and functional app designs.
- Implemented scalable state management using BLoC and Provider, enabling modular, maintainable, and testable application architectures.
- Integrated RESTful APIs and Firebase services for authentication, real-time updates, AppsFlyer, payment gateways (Authorize.net, Apple In-app, Google In-app) and cloud storage across multiple apps.
- Built and managed CI/CD pipelines using GitHub Actions, streamlining build, test, and deployment workflows for faster, error-free releases.
- Completed the most recent app 1 week early by improving development processes and addressing issues quickly.
- Collaborated in Agile teams, participating in daily stand-ups, sprint planning, code reviews, and pair programming to deliver sprint goals effectively.
- Led and mentored a team of interns, conducting code reviews and guiding the development of initial mobile applications in Flutter and Kotlin.
- Created responsive HTML/CSS email templates for marketing and transactional communications, ensuring compatibility across major email clients.

Flutter Developer | Reubro International

January 2022 - August 2023, Kochi, Kerala

- Developed multiple standalone Flutter applications including a social media app, dating app, e-commerce app (integrated with BigCommerce), and a job search app.
- Integrated RESTful APIs and Firebase services for authentication, real-time updates, and cloud storage.
- Set up automated CI/CD pipelines using GitHub Actions for seamless build and deployment.
- Delivered the apps at least 1 week ahead of schedule by optimizing development workflows.
- Reduced app crash rate by 30% through systematic debugging, analytics monitoring, and performance optimizations.
- Upgraded and fixed bugs in legacy Android applications developed in Java and Kotlin.
- Participated in Agile ceremonies including daily stand-ups, sprint planning, code reviews, and pair programming.
- Collaborated closely with designers and backend developers to deliver sprint goals efficiently.
- Trained and mentored a team of interns in Flutter and Kotlin development; conducted code reviews and provided guidance during the development of initial mobile applications.

Flutter Developer | Freelance

January 2021 - December 2021, Remote

- Collaborated with companies (Instyart, Acube International) through a local contact.
- Developed a comprehensive management system for businesses such as dance and music academies to efficiently handle students, classes, and payments.
- Helped in developing a KMRL project for small businesses inside Kochi Metro and a government project for Hemophilia patients, which gave valuable insight into the security measures and standards followed in government applications.
- Implemented student enrollment and attendance tracking modules to streamline daily class management.
- Created a payment processing system supporting multiple payment methods (Google In-app, Apple In-app, Stripe), ensuring secure and timely transactions.
- Built scheduling features for classes and instructors, enabling conflict-free timetable management.
- Developed role-based access controls to manage different user permissions for admins, instructors, and staff.

- Integrated notifications and reminders to keep students and instructors informed about class updates and payment dues.
 - Implemented reporting tools for business owners to track revenue, student progress, and class attendance (Firebase analytics).
 - Collaborated with stakeholders to gather requirements and iteratively improve the system based on user feedback.
-

PROJECT

Sprinkle | Letkik Consultancies

play.google.com/store/apps/details?id=com.lektik.sprinkle, July 2024 - Present

- Developed a cross-platform sports betting app with clean architecture, modular BLoC-based state management, and responsive design optimized for performance and user engagement.
- Implemented secure authentication workflows including Email, Google, and Apple sign-in, along with in-app purchases and subscription flows integrated with multiple payment systems.
- Built features including geolocation-based personalization, local data persistence, and timezone-aware scheduling to enhance user experience and support global accessibility.
- Enhanced app interactivity with modern UI/UX elements such as animations, progress indicators, skeleton loaders, embedded web views, and deep linking.
- Configured crash reporting, analytics, and app monitoring tools to track performance, diagnose issues, and improve app reliability across sessions.

Narraited (Android/iOS/Web) | Lektik Consultancies

app.narraited.com, August 2023 - May 2025

- Built a cross-platform chat-based biography builder that guides users through chapter-wise storytelling using structured prompts and rich text editing.
- Integrated voice input and audio features, enabling users to narrate stories using speech recognition, audio recording, and playback capabilities.
- Implemented secure multi-provider authentication (Email, Google, Apple) and seamless navigation across Android, iOS, and web platforms.
- Enhanced user experience with interactive UI, animations, multimedia support (file uploads), push notifications, and responsive design.
- Managed state across key modules including onboarding, chat, and chapters, and deployed apps to Google Play Store, Apple App Store and Azure Static Web app.

Employee Management Application | Reubro International

October 2022 - September 2023

- Built an employee/employer management app to handle attendance, process time-off requests, manage payroll, and deliver announcements.
- Implemented GETX MVVM architecture for efficient state and logic separation.
- Integrated push notifications, calendar views, and role-based access for enhanced usability.
- Designed with role-based access to differentiate admin and employee functionalities.

GreenWealth | Reubro International

April 2023 - August 2023

- Developed a mobile app for browsing and purchasing hair care products integrated with BigCommerce backend.
- Built UI components for product listing, filtering, and cart management using Flutter.
- Implemented secure user authentication and seamless checkout flow with integrated payment gateways.

Job Search Application | Reubro International

November 2022 - December 2022

- Developed a job search platform connecting heavy vehicle owners with companies using the GETX MVVM pattern.
- Implemented job listing, filtering, and application tracking modules in a clean and responsive UI.
- Integrated basic location services to enhance job relevance based on geography.

Petty | Reubro International

March 2022 - December 2022

- Created a swipe-based dating interface similar to Tinder with profile browsing and matching features.
- Integrated real-time chat, media sharing, and user preference filters.
- Ensured secure sign-up/login via email and third-party services.

Ashadhara | Freelance

October 2021 - December 2021

- Developed a secure Android application in Kotlin for a government initiative named Ashadhara, designed to collect health-related data through a simple questionnaire interface.

- Implemented root detection to identify rooted devices and automatically close the application to prevent tampering or unauthorized access.
- Integrated additional security measures such as code obfuscation, SSL pinning, and restricted screenshots to ensure compliance with government security standards.
- Designed a clean and user-friendly questionnaire flow, ensuring accessibility for users with minimal digital literacy.

Organization Management App | Freelance

January 2021 - December 2021

- Developed a comprehensive management system for businesses such as dance and music academies to efficiently handle students, classes, and payments.
 - Implemented student enrollment and attendance tracking modules to streamline daily class management.
 - Created a payment processing system supporting multiple payment methods (Google In-app, Apple In-app, Stripe), ensuring secure and timely transactions.
 - Built scheduling features for classes and instructors, enabling conflict-free timetable management.
 - Developed role-based access controls to manage different user permissions for admins, instructors, and staff.
 - Integrated notifications and reminders to keep students and instructors informed about class updates and payment dues.
 - Implemented reporting tools for business owners to track revenue, student progress, and class attendance (Firebase analytics).
 - Collaborated with stakeholders to gather requirements and iteratively improve the system based on user feedback.
-

EDUCATION

Master of Computer Applications | Indira Gandhi National Open University

Delhi, 2026

Bachelor of Technology in Mechanical Engineering | Universal Engineering College

Vallivattom, Kerala, 2016

SKILLS

Technical Skills: Flutter, Dart, Python, Fastapi, React, Html, CSS, Wix, Android (Jetpack compose), Azure, Git, GitLab, GitHub, Firebase, PostgreSQL

Software: Android Studio, Visual Studio Code, PyCharm, Figma, Word, PowerPoint

Flutter State Management: Provider, Riverpod, BLoC, GetX, SetState

Flutter App Enhancements: App Localization (i18n) – for multilingual apps, Push Notifications – using Firebase Cloud Messaging (FCM), In-App Purchases / Subscriptions, Deep Linking, App Lifecycle Management, Local storage (Hive, shared preference, sqflite, Flutter web, Flutter desktop, Geocoding, Geolocator

Security & Permissions: OAuth (Google/Apple Sign-In), Secure Storage, Permissions Handling, Root detection and handling, SSL Pinning

API Integration: GraphQL, WebSockets, RestAPI

UI/UX & Design: Custom Animations with Flutter, Rive, Lottie, Responsive Layouts, Design Systems & Figma

Cloud & DevOps: CI/CD with GitHub Actions / Codemagic, Crashlytics, Appsflyer, App Distribution Tools like Firebase App Distribution, TestFlight, Play Store, App Store, Azure webapp, GitHub pages

Project Management & Collaboration: Agile app development using Jira and Trello
